# 1 Crazy New Way to Make Money and 5 Ways to do it.

2017 - The year to make magic happen

---

---

Welcome to the incredible world of CNC Pro

---

Everyone it seems is looking for that Unicorn or Silver Bullet. The thing that will launch them into millions of dollars online with zero effort required.

And while this isn't exactly a bad thing to want, it isn't something that everyone knows how to do. It's a bit like winning the lotto. You might have one or two lucky people who get to experience it, but it's back to the grind for you after.

With many things online to attract others, there are still several real world things someone can do to make decent money. And that is what the CNC Pro is all about: Get you active and a good, solid income stream established.

This portable CNC machine can go to any job site. Concrete, Stone, Wood, Glass, etc. All of these existing surfaces can be engraved.

These are a few ideas of how you can use the CNC Pro to make money.

---

# 1. PAVERS

Gardens... People **love** to garden. Infact, roughly 1 out of 3 people in America do. If you do the math about how many people are currently living in the US then that adds up to be a **ton** of people.

US Population

With gardening generally comes the need to make their garden feel more homely and friendly looking. This is great because the pavers they use as stepping stones between those awesome garden boxes can now be customized with whatever they would like. And at less than \$2 per paver, it's easy to make a lot of them (and a lot from them!) What can you do?

Their cat, dog, special quote, veggies, fruit - almost anything can be created on this sort of material. Really, the choice is theirs. But when you take a look at all of the options it's no wonder why this is such a great way to add more flavor to their garden.

## Sales Ideas

Going to a home and garden trade show with many of these pavers already done can be some quick cash in your pocket. And we have tons of stock art files for you to use to get started. Even the swapmeet works!

---

## 2. BOULDERS

**Ok, so some people can get obsessed about their houses.** When you move a 1-3 ton boulder into your property, I'd call you serious about your home. But now that it's there what the heck can you do with it?

Why not put the address of the house on it? Maybe a majestic animal as well. Deer, butterfly, **dragon**- you know, those normal things.

To move one of these boulders can require heavy machinery - which isn't cheap. But when you can take the CNC Pro to their house and engrave it right there then Voila! Instant magic.

### Sales Ideas

A door-to-door flyer campaign works wonders here. You can easily rack up several jobs which quickly pay for the promotion. And when the neighbors start to see/hear about the Jones' up the street then it's "game over, man."

---

## 3. DRIVEWAYS

**Lets face it...**traveling to a family member's house can be redonk (Ridiculous) at times. It's also tough for some delivery people and even emergency personnel. Some people don't have the best eyesight on this planet. That's why our good ol' friend Ben really did us a favor when he created the bifocal (Thanks, Ben!)

When you can throw the street address of the house on the drive way and make it 4-6 feet across, there is no excuse for "couldn't find it!"

The big story here is how it can help with emergency personnel. When there is something going on, you need to be able to find the house quickly. Outside of a fire (for obvious reasons) that can be hard. It's a complaint of these heroes as well. What can you do?

With literally THOUSANDS of fonts to pick from, you can find something to match the homeowner's personality. And some of these people really do have 'personality' as I am sure you are aware of. So finding something that matches them isn't too difficult.

Sales Ideas.

A door-to-door flyer campaign works well here too! You'd be surprised at the response rate when they start seeing what it does. And then it goes back into the see/hear about it from the neighbors.

---

## 4. TILE

**Ah, the bathroom.** Something we all can both love and hate - And something that can cost an absorbent amount of money to try and remodel.

What can you do?

Either existing tile or new tile will work here. Creating a pattern, design or amazing quotes to look at while you do your business can help things along. That's why this business idea is a great one. People do a lot of business in this "office" at home.

Sales Ideas

Networking skills come into play here if you want to take a different path here. You can most certainly do other types of promotional methods, but what has been found to work well here is to team up with general contractors and offer your services. Home Builders, handyman and even plumbers. Kick them some sort of finders-fee and you're in business - but not the number 2 type of business...

---

# 5. BUSINESS LOGOS

## **Operation Awesome Activated. Hold on Tight...**

Probably the most profitable service we have found is with business owners.

As Henry (The Owner of RedArt Technologies) regularly says: “The money is in the concrete.” This is because of how new it is.

Stamping or decorative concrete has been around for awhile, but when you can throw a logo down inside a business and then lay down some epoxy in it, people lose their minds.

- **The local coffee shop and a 5 foot wide cup of coffee.**
- **The vet and having their floor rain cats and dogs.**
- **The floor shop and their logo in their showroom.**
- **I think you see where I am going here...**

### Sales Ideas

Taking a display board around to different local stores is how to work this one. Showing them photos and the display board and you have yourself a conversation with an interested person. (Also ask about our CNC Sales Playbook to help walk people through how it’s done!)

At \$65 a sq foot for regular designs and then \$85 a sq foot for epoxy inlays, you quickly make that daily income target you have had.

---

# Conclusion

A new disruptor has entered the field: Uber doesn't own any cars, Airbnb doesn't own any rooms, Facebook doesn't have to publish any content, Alibaba doesn't manufacture any parts. And now you don't have to have a storefront or even a shop to work from.

With disruption comes opportunity and with that opportunity comes the chance to make a lot of cash quickly.

And we are here to help!

There is so much more that we haven't even touched on here with ways to also get business:

**6. Patios are a great one** if you want to avoid pressing your hand into wet concrete. Why not create a family crest and throw that down. Color? Sure. That can be done too.

**7. Side walk to your front door** or along the side of the home - Why not engrave some vines down along the edges of it? Make the home feel more green.

**8. Wall Art**- Take some simple sheets of wood you can get from Lowes or Home Depot and create some amazing 2D art work to decorate the home. Add Color of extra effect.

---

9. **Garage Logos/Man Caves.** Boys and their toys. Most guys have expensive toys. Corvette, Harley-Davidson, Quads, etc. Creating a logo in the garage of their favorite brand or even an image of them in or on their car or bike. **#Wow**

10. **Granite Countertops-** There are tons of applications here with quotes or images of people on their countertop itself. Fill it in with some clear epoxy and smooth it down and you have an incredible look.

**Give us a call** and let's talk about this brand new chance for you to use the CNC Pro to carve the path to your real goals in life.

The ***Timing*** is right  
The ***Potential*** is awesome  
And ***You*** can do this

Call now!
