# Here's the Deal

RedArt Technologies provides and continues to improve a portable, precision-driven CNC portable engraving machine. We ensure our clients receive quality products, extensive training, continued support and the latest advancements in CNC technology.

## Diamond Bits

Engrave concrete, stone, granite, tile, brick and much more.

## Global Demand

The CNC Pro is in extremely high demand in multiple countries, even as far away as Australia.

## Tested

10,000+ jobs have been successfully completed with the CNC Pro. It is a proven and hardened system for business big and small.

## Portable

The RedArt Technologies CNC Pro is the only portable engraving system, designed to travel anywhere and engrave anything on any surface. The CNC Pro is shipped and stored in a waterproof, high-density plastic case.

## 1 Yr Warranty

We are proud of our 5 Star Facebook rating\* CNC Pro owners, of all types, have shared their experiences with the world.

## Support

Not everyone learns the same way. That's why we offer training and support in every form. On-site, Online, video and much more. Our team of CNC Pro experts are ready to assist.

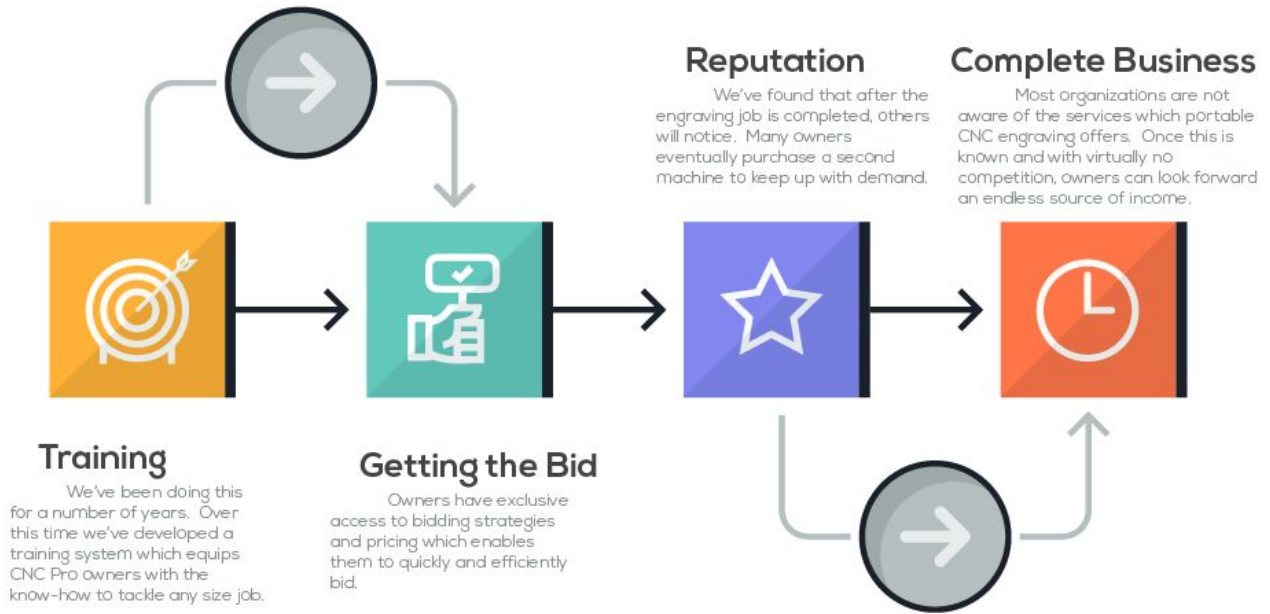

# From Purchase to Success

The below is a sample time-line taken from a real CNC Pro owner.

# The CNC Pro System

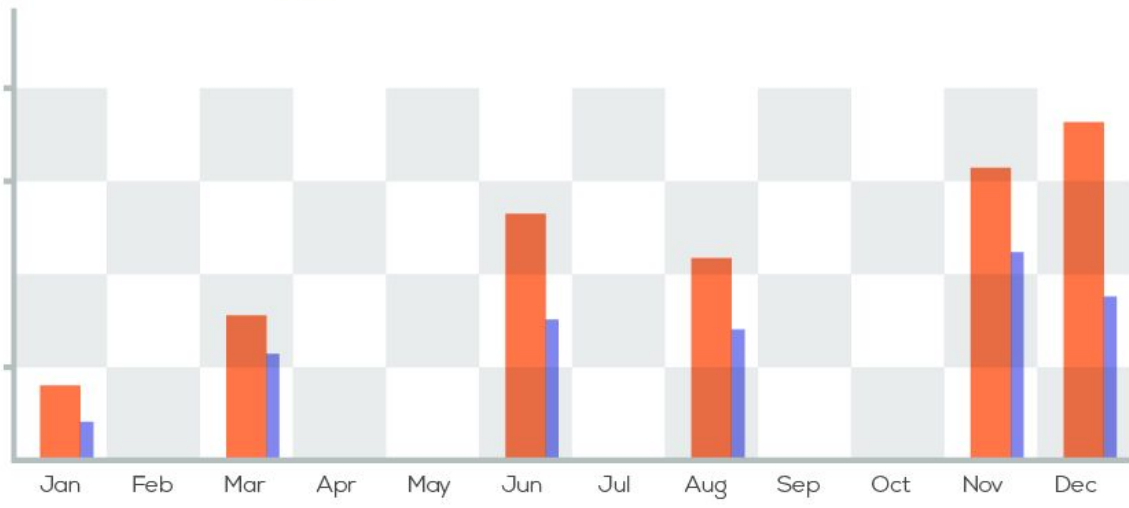

The RedArt Technologies CNC Pro is the first portable engraving system designed to travel anywhere and engrave anything on almost any surface. Shipped and stored in its own carrying case, the CNC Pro is protected in a waterproof, high density plastic case and secured in customized foam lining that provides the durability to make it the most mobile machine of its kind and ensures the protection of all components.

# CNC Pro Sales

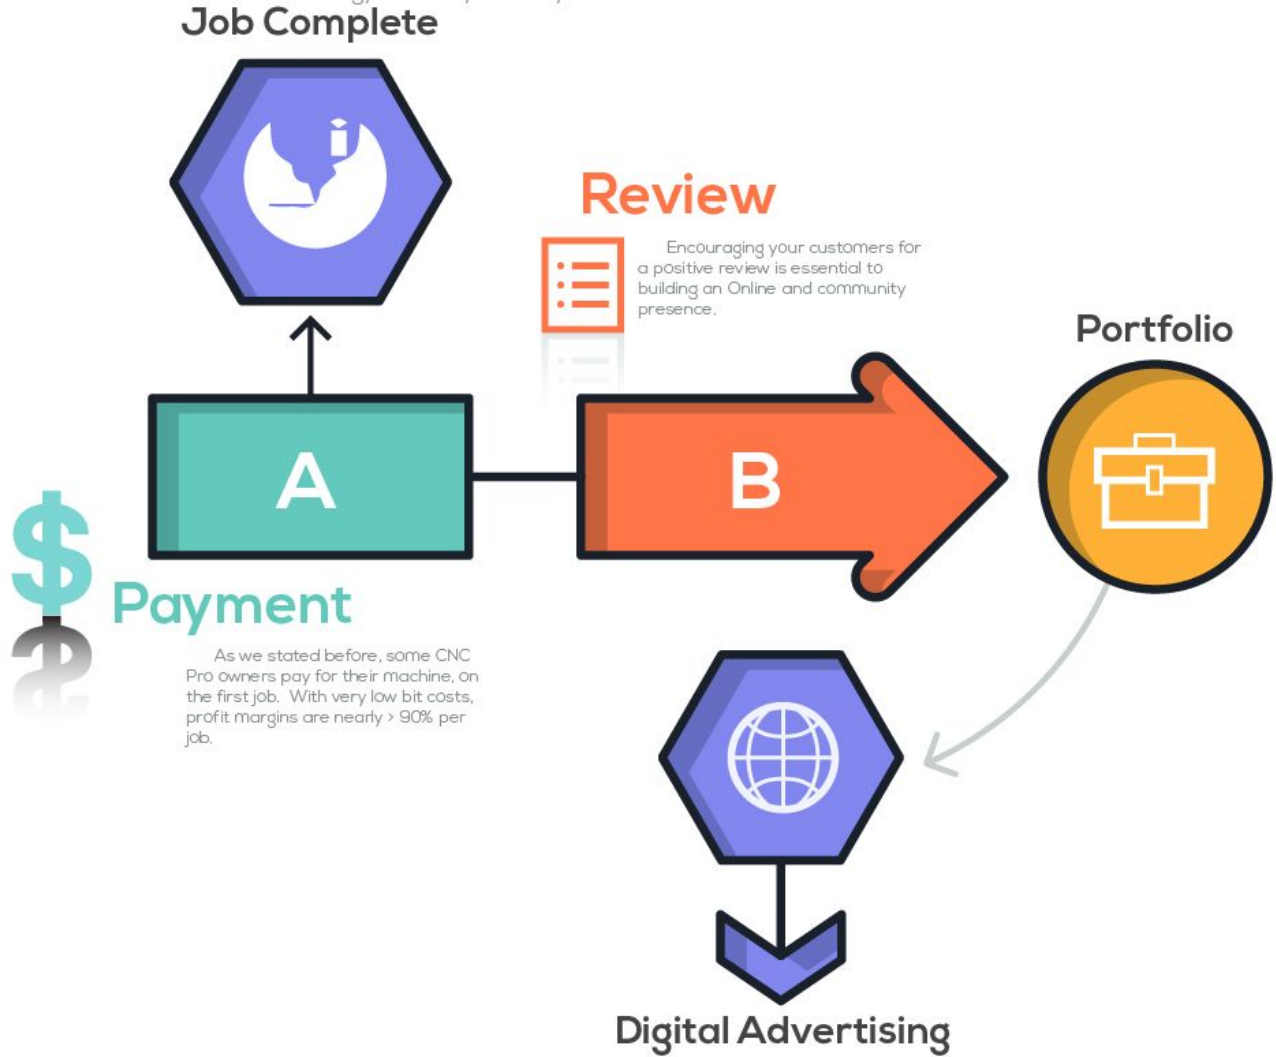

**CNC Pro Sales**  
**33% Increase - 2018**

**Steady Growth**  
As pioneers in the portable CNC engraving business, the CNC Pro has seen a steady growth, year over year.

# Grow With Every Job

At RedArt Technologies we strive to be the very best in the business. Our motto, "Your Life is Our Expression," says it all. To us, that means when you own a CNC Pro system, either as a customer or a distributor you are part of the RedArt family and share our excellence-driven culture. It is in our best interest that you understand every facet of Red Art's CNC Pro and the technology so that you and your business can thrive!

## The Data

The typical on-site job takes anywhere from 1-12 hours and ranges from \$250 - \$4,000

# Training Options

Mr. Ashworth has developed a system that is portable and allows for existing businesses or entrepreneurs to market their services with virtually no competition in an untapped marketplace. We provide a low-cost entry platform with full-training and support. Not everyone learns the same way, we offer an array of training options for our CNC Pro owners.

## Video D

RedArt Technologies maintains and releases regular video tutorials, available to CNC Pro owners. We also periodically provide live demos and how-to's to better equip our users.

## Online A

In addition to 1 on 1 support, we offer self-paced Online material which CNC Pro owners can reference to during the training process.

## Remote C

We understand that your time is valuable. We offer remote support and learning, 1 on 1 with a CNC Pro expert. Just read our reviews, owners are blown away at our level of commitment.

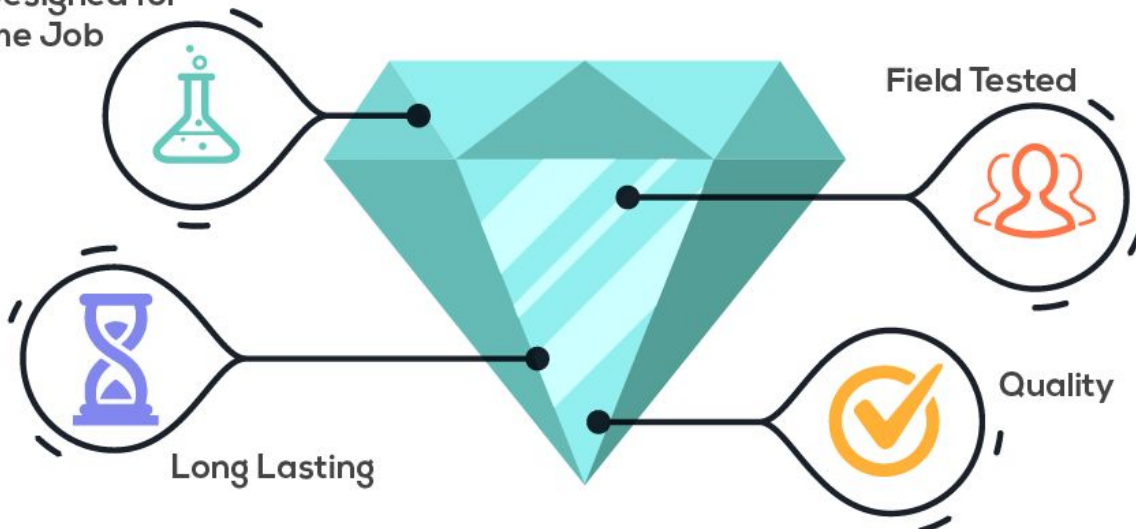

## On-Site B

For businesses big and small, we offer on-site training for owners and their employees. We offer hands-on training globally to CNC Pro owners.

# Bit Quality

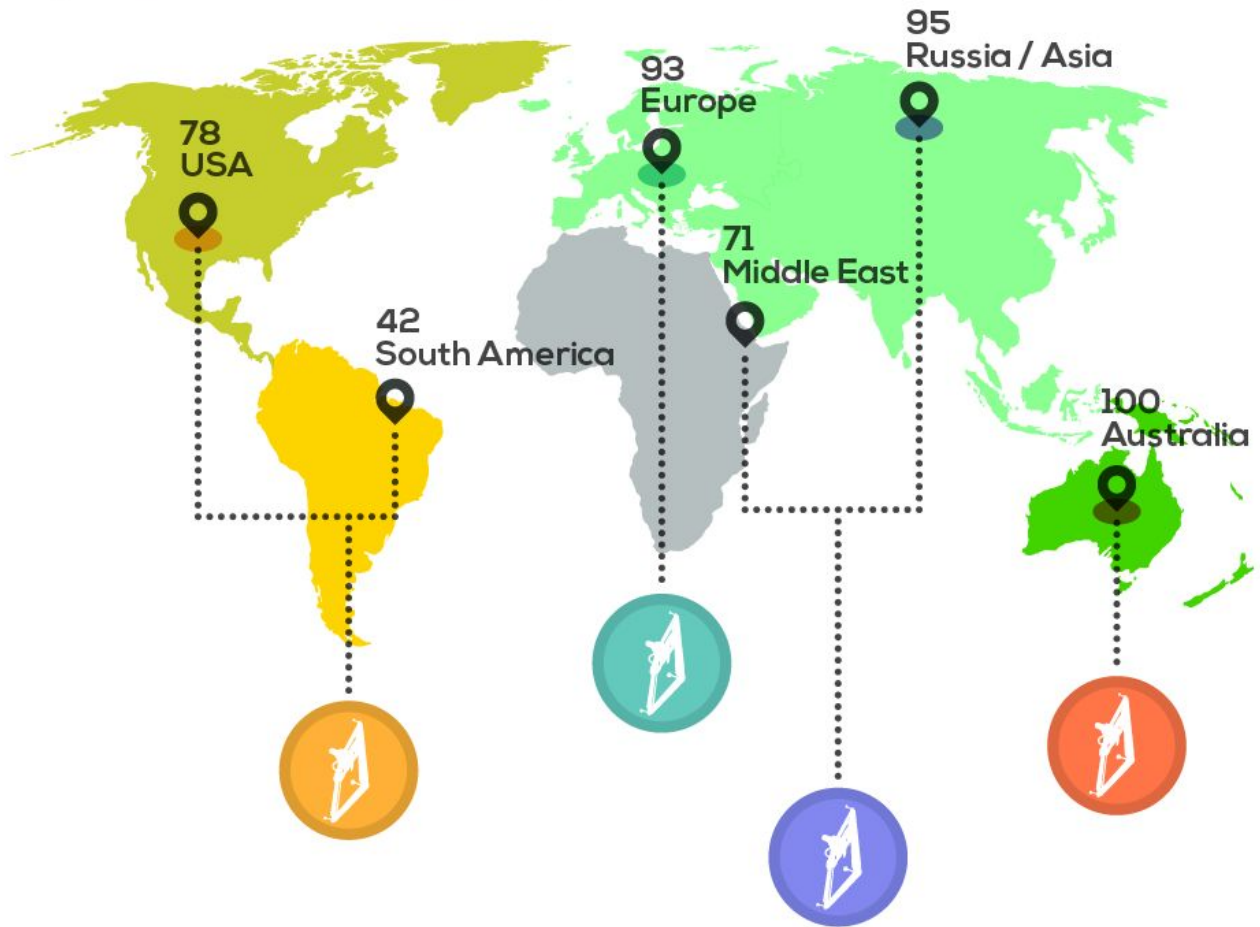

RedArt Technologies offers our highest quality diamond bits to CNC Pro owners. Our bits are field tested and selected based on their high quality and manufacturing process.

## Designed for the Job

# Concrete Engraving Trends

Trends taken from a combination of search terms querying: trends.google.com within a sample period. Trends are assigned a value from 1 - 100 and are a sum for regions.

## Americas

Of the sampling data 27% were taken from the Americas.

— 27% —

## Australia

The largest sampling data was taken from Australia and New Zealand.

— 35% —

## Europe

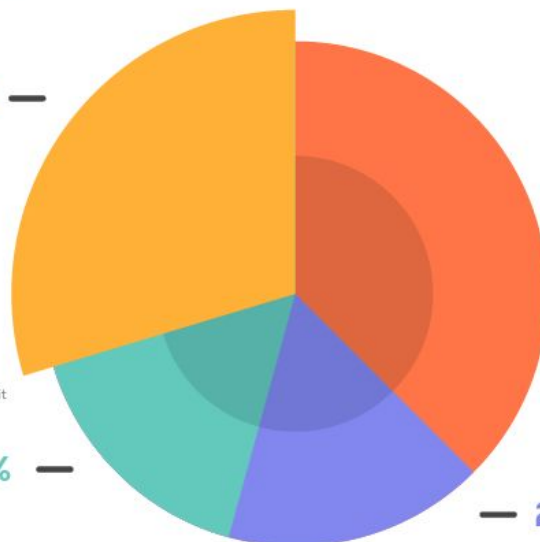

Although Europe has the smallest amount of sampling data, it is trending positive along with the rest of the world.

— 15% —

## Asia / Middle East

Right along with the Americas, the Middle East and Asia offer a strong amount of data which Google derived these trends.

— 23% —

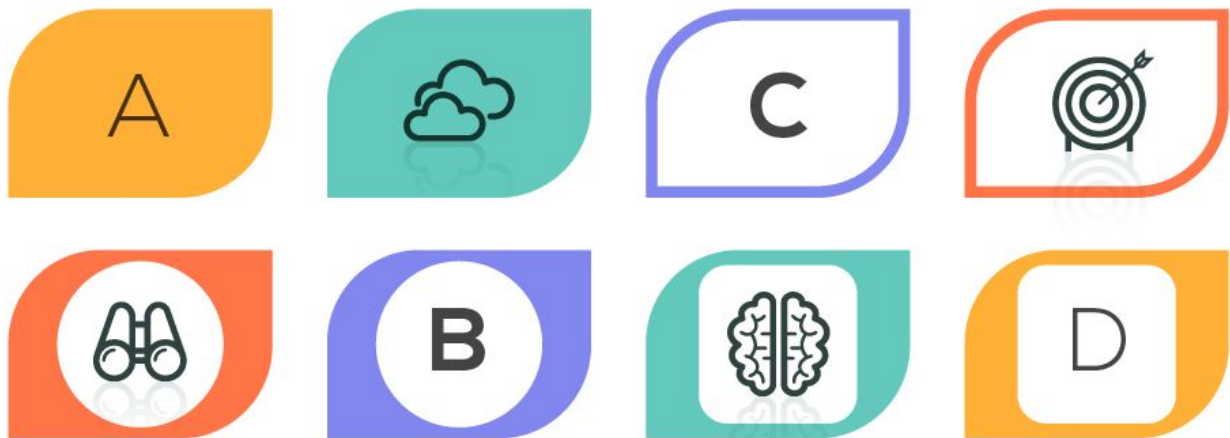

# Potential Applications

With an adjustable rails system, floating z-axis (for uneven surfaces), rigid frame and vertical capability, the CNC Pro has endless potential applications. Below are some of the most commonly reported jobs.

\$2700		<b>TEXT ENGRAVINGS</b> Most CNC Pro owners report that their largest profit margins are gained when engraving text for governments and businesses. Our CNC Pro's come with fully licensed software which is programmed to engrave both logos and text.
\$1800		<b>LOGO ENGRAVINGS</b> Every brand is recognized by its mark. That's why the visibility of a business mark is crucial to the success of any business. The CNC Pro system can be used to beautifully display a company's logo on a building, sidewalk, door or any number of surfaces.
\$30-60		<b>PAVER ENGRAVINGS</b> A surprisingly easy way to build skills and make a profit, pavers are key to making fast money. Personalized pavers can be used as stepping stones, variety indicators, pet memorials or establishment placards. They can also be used to showcase a gardeners' favorite quotes, poems, and expressions.
VARIES		<b>ARTISTIC ENGRAVINGS</b> The possibilities for a CNC Pro portable engraver are endless. Users are limited only by what is in their imaginations. With the CNC PRO anyone can create wall art, sidewalk engravings, placards, metalwork or wood engraving.

## Endless Possibilities

# Frequently Ask Questions
